Working Prototype Report

Revision Number: v1.1

Revision Date: 06/05/17

List of Functions Not Working Correctly -

1. Delete Post

- a. A user is able to delete posts made by them successfully.
- b. Upon initial view, a user does not have the option to delete posts that was not made by them
- c. However, if a user creates a post, and deletes it, the delete button will show up for all posts, even those that are not made by them.
 - i. This path allows a user to delete posts that do not belong to them.

2. Security

- a. All security is primarily done through the front-end. If any http request is intercepted, a user could Delete or modify posts that are not their own. They could also tag and vote more than once if they Intercept the http requests.

3. Synchronization

- a. The feed components can exhibit strange behavior over tim.

4. Search

- a. The search page is not working, but it still does in the public feed and popular feed
